

## FUNNEL TRAP

Place pheromone in cage and seal with cap. Insert into hole at the top of the lid and push down, making sure the cage is secure.

Insert the lid into the funnel and push down to ensure a secure fit.

Insert strap into holes at either side of the funnel. NOTE: once inserted, the strap cannot be removed.

For ease of fixing, hold strap gently to one side, take the bucket and line up with the funnel (see asterisk on diagram). Push together ensuring secure fit. Slip clear strap between grooves at base of bucket.

Hang with string from loops on the top of the lid.
